SUMMARY

Data engineer and Python developer with a background in relational databases and data pipelines. I build ETL systems that turn messy CSV files into clean, queryable databases — from small automation scripts to full data warehouses. Comfortable across the stack: Python, SQL, PostgreSQL, Docker. Recent project: end-to-end pipeline for 1.5M rows across 9 tables, running in Docker, with schema validation and automated tests.

TECHNICAL SKILLS

- **Languages:** Python, SQL, PL/SQL, Java, C++, R
- **Databases:** PostgreSQL, Oracle, MySQL, MS SQL Server, NoSQL, semantic databases, knowledge graphs
- **Data tools:** Pandas, NumPy, Pandera, Excel, CSV, JSON
- **Infrastructure:** Docker, Git, GitHub Actions, Linux, YAML
- **Testing & quality:** pytest, data validation, ETL best practices
- **Also familiar with:** REST APIs, Airflow basics, statistics, machine learning, NLP, computer networks, cloud basics

PROJECTS

End-to-End ETL Pipeline

github.com/anna1sheludko/end-to-end-pipeline

Python, Pandas, PostgreSQL, Docker, Pandera, pytest

- Built a full ETL pipeline for e-commerce data: 9 tables, approximately 1.5 million rows.
- Extraction with retries, schema validation with Pandera, and loading via PostgreSQL COPY protocol — 8x faster than row-by-row inserts.
- YAML configuration, structured logging with rotation, unit tests, GitHub Actions CI, and reproducible setup via Docker Compose.

API to PostgreSQL Pipeline

in progress

Python, REST APIs, PostgreSQL, Docker

- Building a pipeline that pulls data from a public REST API, validates it, and loads it into PostgreSQL for analytics.

EDUCATION

BSc in Data Engineering

expected 2026

Kielce University of Technology, Poland

- Coursework: databases, data warehousing, semantic databases, knowledge graphs in enterprise, machine learning, statistics, programming (Python, Java, C++), computer networks, project management.
- Six-month professional internship as part of the curriculum.

LANGUAGES

Ukrainian (native) | **English** (B2) | **Polish** (B2)

AVAILABILITY

Available for freelance projects: remote, project-based, or ongoing retainers. Prefer email contact. I reply within 24 hours.
